November 24, 2010

Dear Patient,

On November 19th we were notified by the FDA that propoxphene sold under the brand names Darvon and Darvocet was being withdrawn from the market. This withdrawal is due to new data showing that the drug can cause serious toxicity to the heart, even when used at therapeutic doses. During the last 6 months you have received a prescription from our office for the medication propoxphene. Please discontinue use of this medication. If you have any questions please contact our office at (248) 735-9815.
